

Climate Change News

P.E.I is Disappearing

Prince Edward Island, made of sand and sandstone, is slowly washing away into the sea due to climate change-based erosion. On average, P.E.I loses 28 centimeters of land each year.

Sobeys Ditches Single-Use Plastic

January 31 marked Sobeys' new sustainability efforts. No longer offering single-use plastic, Sobeys has switched to a re-useable bag model. This effort is expected to eliminate 225 million plastic bags out of circulation each year.

An Overview on Climate Change in Canada

According to a recently released intergovernmental panel on Climate change, Canada will suffer the consequences of climate change if we continue to stick to business as usual and not change our rate of emissions.
